The 900 records available in the Inventory Management program are divided into nine (9) Categories, all of which have a maximum of 100 records per Category, because that number is the maximum that may be passed to the Personal Record Keeping program. The Categories are organized by cartridge title; ABC, DEF, GHI, JKL, MNO, PQR, S, TUV and WXYZ.

Access to a cartridge record for adding/editing in the UPDATE program does not use Categories. Instead, you would use Rec#. Thus to access the ADDITION cartridge, you would use the UPDATE program and call up record #009, or just record #9.
